CLIENT

Boeing Defense & Space
Group

COMPLETION

1995

SIZE

200,000 sf

COST

\$25 Million

ROLE

Architect

DESCRIPTION

Boeing Helicopter's R&D and Manufacturing plant was expanded through the addition of a new 200,000 SF building, which is interconnected with existing facilities to form a complex of executive, administrative, and research office space. Boeing's new 'flagship' has a curtain wall based on back ventilated metal cladding, and provides a signature identity in keeping with the plant's strategic location just south of Philadelphia International Airport.
