\$4 Billion

ROLE

BLTa NV Mater Planner and Architect

DESCRIPTION

BLTa NV provided master planning for the Echelon Place development and full architectural design services for the majority of the development including the casino, podium, and food and beverage areas, the meeting center, the retail promenade, and three of the five hotels including: Echelon, a resort hotel with 2,450 rooms of upscale accommodations thought-fully appointed to host guests visiting for business or pleasure. The collection of rooms includes standard guestrooms, hospitality lofts, and poolside bungalows. Guests have access to lushly landscaped pools, gardens, cabanas, and two distinct spa experiences.

Enclave, a suite hotel, will feature 630 suites with a separate, secluded entrance and garden arrival. This hotel will offer Echelon's style, service, and amenities at a higher level. Exclusive restaurants and a separate spa and pool area further define the suite hotel experience. Shangri-La will feature 280 guestrooms and 70 suites with a focus on warm and caring Asian hospitality and service. The hotel will include a CHI spa, distinct meeting rooms, ballroom, and an Asian-influenced feature restaurant.
