### CLIENT

Boyd Gaming

### COMPLETION

2009

### SIZE

### COST

WND

### ROLE

Master Planning, Architect

### DESCRIPTION

BLTa NV provided architectural and interior design for the administrative and executive spaces as well as all of the employee and support spaces. The executive offices feature white marble floors which contrast with warm sapelle mahogany walls highlighted with a hand-stitched charcoal leather panel. A rosaline glass, created specifically for use at Echelon, sets the tone for accent colors used in the fabrics of the seating area. Concealed lighting and minimal millwork detailing contribute to the streamlined aesthetic and overall modern approach. These clean lines carry over to the furniture, carpet and art selections.
